

DAILY CARE ROUTINE

Daily Leopard Gecko Care Checklist

Tick a box each day. One sheet lasts a whole week. Geckos come out at dusk, so the evening jobs matter most.

Lives 10–20 years

90°F warm / 75°F cool

Live insects

Calcium every feed

Morning

M T W T F S S

Check both temperatures

Warm side around 90°F, cool side around 75°F.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Fresh water in the shallow dish

Change it even if it looks clean.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Damp down the humid hide

Moss should feel like a wrung-out sponge, not soaking.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Daytime

M T W T F S S

Spot-clean any droppings

One corner of the tank is usually the toilet.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Check the thermostat is holding

The thermostat only controls the spot its probe touches.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Let them rest

Daytime is their night. Hiding all day is completely normal.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Evening

M T W T F S S

Feeding nights: offer insects

Every 1–2 days. Nothing bigger than the gap between their eyes.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Dust the insects with calcium

A light dusting, right before you offer them.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Watch them hunt

Feeding time is the best way to check they're well.

☐	☐	☐	☐	☐	☐	☐
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

Quick health look

Clear eyes, fat tail, belly off the floor when moving.

Our pet-care team

Week beginning _____ Whose job is it this week? _____

Most leopard gecko health problems come from the wrong temperature or missing calcium — not from bad luck. The daily temperature check is the most important job on this sheet.
